OFFICE ACTION

Examiner's amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CAR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the claims:

Cancel non-elected claims **7-12** due to the Election without traverse on February **7**, 2005.

The examiner's amendment has been made in order to place the application in a condition for allowance.

2. In response to the Election received on February 7, 2005, the elected claims 1-6 and 13-24 are pending in the application and non-elected claims 7-12 are cancelled per Examiner's amendment above.

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

4. This office acknowledges receipt of the following items from the Applicant: Information Disclosure Statement (IDS) filed on December 8, 2004. Information disclosed and listed on PTO 1449 was considered.

Drawings

Application/Control Number: 10/706,778 Page 3

Art Unit: 2824

5. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because Figures 1-9 has been corrected with "Background Art". Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Examiner's Statement of Reasons for Allowance

6. Claims **1-6** and **13-24** are allowed.

Miyazaki et al. (US 6,320,799), Yokozeki (US 6,243,319), Takita et al. (US 6,198,686) and Kim et al. (US 5,912,857) disclose a row decoder similar to that of the present application, but fail to teach:

"a first NAND gate for generating a reset gate signal in response to an address signal and a reset signal; a second NAND gate for generating a selection gate signal in response to the address signal and a selection signal; a first latch for resetting an output thereof in response to an address latch signal and latching the address signal as the output in response to the address latch signal and the address signal; a third NAND gate for receiving the address signal and a transmitted signal; a fourth NAND gate for receiving the output of the latch and a shutter transmitted signal; and an OR gate for receiving the outputs of the third and fourth NAND gates and generating a transmitted gate signal" as claimed in the independent claim 1; or

"a first NAND gate for generating a reset gate signal in response to the address signal and a reset signal; a second NAND gate for generating a selection gate signal in

Art Unit: 2824

response to the address signal and a selection signal; a first latch for resetting an output thereof in response to an address latch signal and latching the address signal as the output in response to the address latch signal and the address signal; a third NAND gate for receiving the address signal and a transmitted signal; a fourth NAND gate for receiving the output of the latch and a shutter transmitted signal; and an OR gate for receiving the outputs of the third and fourth NAND gates and generating a transmitted gate signal" as claimed in the independent claim 13; or

"gate reset means for generating a reset gate signal in response to an address signal and a reset signal; gate selection means for generating a selection gate signal in response to the address signal and a selection signal; first latch reset means for resetting a latch output signal in response to an address latch signal; first latch set means for latching the address signal as the latch output signal in response to the address latch signal and the address signal; and gate transmission means for generating a transmitted gate signal in response to the address signal, a transmitted signal, the latched output signal, and a shutter transmitted signal" as claimed in the independent claim 19.

Any comments considered necessary by applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comment on Statement of Reasons for Allowance".
